The Future Ready Comprehensive Planning Portal was created to provide a consistent planning framework and collection tool for all Pennsylvania local education agencies. This model provides flexibility in the planning process based on individual community needs, is grounded in an outcomes-based approach focused on student achievement and encourages schools and districts to more effectively and efficiently plan and lead innovative school improvement practices. This approach allows school districts to develop cohesive long-term goals and action plans, monitor yearly progress, and provide transparency in communication with school personnel, state officials, parents and community. Establishing a committee inclusive of a diverse group of stakeholders is critical to the success of the comprehensive planning process. This provides an opportunity to engage with all stakeholders in an ongoing and meaningful way.
