

PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER FAILURE TO MONITOR

**ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE
ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

Monitoring Requirements Not Met for Lehman Jackson Elementary

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2022-2024 we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
PFAS (PERFLUOROOCTANE SULFONIC ACID/ PERFLUOROTANOC ACID)	Quarterly (Initial Requirement)	0	By the End of the First Quarter of 2024)	6/18/2024
DI(2-Ethylhexyl) PHTHALATE	Annual	0	During 2022	6/18/2024
HAA/TTHM	Annual	0	August 4 th 2022	6/18/2024
Chlorine	Weekly	0	Weekly in the Month of July 2023	August 2023

What happened? What was done? When will it be resolved?

PFAS- the PFAS testing was conducted as required in the first quarter of 2024. An instrument malfunction at the subcontracted Lab caused the sample to go beyond the hold time for analysis and requires a resample in the first quarter in 2025. See attached CAR from Microbac.

DI(2-Ethylhexyl) and HAA/TTHM- Both samples were due during a period of transition of ownership of Utility Management Services. Both Samples were scheduled to be taken in the second quarter of 2024. Chlorine is monitored weekly and reported monthly to the DEP via greenport. This data was not submitted in the month of July 2023 due to a network error. All data was submitted for august as required

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information regarding this notice, please contact Utility Management and Environmental Services at 570-592-4155.
